Long Beach, California 90803

Dear Dr. Davis,

It is my honor and privilege to offer to you the school-year appointment as a Research Associate Professor of Computer Science for the period of 01 July 2021 until 30 June 2023. Knowing of your academic credentials, your professional accomplishments, and your didactic skills, we are certain that your presence in the Catholic Polytechnic University family will be most beneficial, your contribution to scholarship will be most laudatory and your desire to share your insights with students will be most educational. A series of extensions to your appointment are anticipated, in which case you will be notified of that opportunity at the appropriate time.

You are encouraged to engage in activities that will highlight the University's qualities and its commitment to Catholic ethics and faith. Professional publications are encouraged, with your identifying yourself as a member of the University's academic community. Please keep us informed of any publications so accepted. White papers and communications with research funding agencies are urged and, if they warrant a formal proposal, please inform the University as soon as possible to enable the formal contractual submissions.

This appointment can be terminated by you for any reason, upon notice to the University that you no longer wish to hold the position. Likewise, the University, while anticipating a long and mutually productive relationship, withholds the right to terminate this appointment should they, at their unfettered discretion, determine that it no longer advances and sustains the University's goals. This appointment does not empower you to contractually commit the University in any way, nor should you hold yourself out as being able to do so. You should not purport to speak for the University as a whole, but can express yourself within the bounds of academic freedom in any way commensurate with the University's goals and best interests.

Again, congratulations on your appointment and welcome to the Catholic Polytechnic University academic community.

Vivat Jesus!

John J. Tran, Ph.D.

Computer Science and Engineering Chair

Dean of Academics

Dr. Jennifer Nolan, President

Mr. Jeff Hilger, Esq, VP of Operations

*In studying nature we have not to inquire
how God the Creator may, as He freely
wills, use His creatures to work miracles
and thereby show forth His power: we have
rather to inquire what Nature with its
immanent causes can naturally bring to
pass.*

- Saint Albert the Great
